LOOKBOOK 2017

Bicycles & e-Bikes

We live bikes.

As an owner-operated family business, we have always relied on our entrepreneurial independence and traditional values. We live and work with great passion on our common goal of developing the perfect bicycle for every area of application.

At Kreidler, the topic of bicycles is inseparably connected to a positive life-style characterized by vitality and a zest for life. This enables us to combine entrepreneurial tradition and precision craftsmanship with our passion and enthusiasm at our factory in Oldenburg. These emotions drive us forward day after day.

Today, the Kreidler bicycles "Made in Oldenburg" captivate through their quality, modern design, and innovative technology. They also always score well in independent tests and in the tough racing conditions faced by our mountain bike factory team.

WE LIVE BIKES – FOR YOUR FUTURE AND OURS.

Cross

Cross bikes from Kreidler are light all-rounders and combine style with excellent riding satisfaction. They appeal because you will move quickly with their optimized equipment – for example the sporty derailleurs from Shimano or tires with an especially low rolling resistance.

With their light aluminum frames and the lack of unnecessary accessories, Kreidler cross bikes are optimally equipped for fast riders and urban adventures.

Small Blind 1.0

Shimano Nexus 8-Speed / Disc

City

Player 3.0 Gates
Shimano Nexus 8-Speed / Magura HS11

Full streets, shopping, picking up the children – urban requirements demand the highest level of comfort and reliability. Kreidler City bikes are stylish companions for daily use in the city. The various models stand out due to their excellent comfort as well as their safety and functionality. Their appealing and trendy design as well as our attention to detail make our city bikes real eye-catchers.

Kreidler City bikes – comfortable, functional, and reliable.

Cash 3.0

Shimano Nexus 7-Speed

Trekking

Kreidler trekking bikes are flexible all-rounders on longer tours, in light terrain, or in daily use in the city regardless of the wind or weather conditions. They score with a clever combination of sophisticated components and well-engineered frame constructions – equipped with a comfortable suspension fork or available as a "light model" with a rigid fork.

Kreidler trekking bikes – riding satisfaction cannot be more flexible or individual.

Raise RT 8
Shimano XT 3x10 / Disc

Raise RT 9 Light

Rohloff 14-Speed / Disc

E-Bike

Vitality Big Blind
Shimano Nexus 8-Speed / Disc

Do you want to quickly go shopping in the city, ride comfortably to the office, or take a long tour on the weekend instead? Kreidler e-bikes are available in a wide variety of models and are simultaneously recreational and a sensible mobility alternative. With innovative technology, high demands on quality and manufacturing, and a focus on safety, our e-bikes are made in Oldenburg and guarantee riding pleasure for a long time.

All Kreidler e-bikes have a maximum permissible total weight of 140 kg. Only the Kreidler Vitality Eco Plus offers a little more with 170 kg, and is therefore especially suitable for big and powerful cyclists.

e-powered by

BOSCH

Bosch e-bike drive units are extremely popular thanks to their reliability and especially quiet operation. That is why almost every Kreidler e-bike is equipped with high quality Bosch drive units – depending on the model and category (Comfort, Trekking, or e-MTB) – from one of the three series described in the following:

Bosch Active Line – The perfect drive unit for our Comfort series – always the right choice if you want to ride quickly yet comfortably.

Bosch Performance Line – For frequent cyclists, this sporty drive unit is the perfect choice, regardless of whether you are touring or using it every day.

Bosch Performance Line CX – Ambitious and sporty e-bikers rely on this drive system, which fits perfectly to our top e-MTB.

Bosch batteries – The PowerPacks for the Kreidler e-bikes are available with a capacity of 400 Wh and 500 Wh depending on the model. Since they are 36 volt batteries, they stand out due to their short charging times and long range.

All Kreidler e-bike models can be found at

Vitality Eco 3

Shimano Nexus 7-Speed /
Magura HS22

Impressive quality and outstanding safety – these attributes are combined in the Kreidler Vitality Eco 3. The aluminum frame scores with its especially high stiffness and excellent riding characteristics. In addition, the "smart battery position" behind the seat tube guarantees a high level of stability and safety.

The suspension fork and easy-to-use Intuvia on-board computer ensure driving comfort. In addition, the Vitality Eco 3 has a Shimano Nexus 7-speed hub with coaster brake. This enables soft and smooth shifting. Thanks to the powerful Bosch drive units in the Active Line, you are on your way quickly and comfortably. We have made no compromises in terms of safety: The hydraulic rim brakes from Magura will impress you with their high and precise braking force; and the Trelock LED light set ensures the best possible visibility – even in adverse conditions.

With a rating of GOOD (2.5 on a scale from 1 (VERY GOOD) to 5.5 (UNSATISFACTORY), the Vitality Eco 3 with coaster brake is one of the seven best bikes in the e-bike test conducted by the Stiftung Warentest in their 07/2016 issue.
