A Passion for Racing

In our MTB factory team, we successfully combine the brand's traditional competitive spirit with Kreidler's typical passion and enthusiasm. All Kreidler bikes benefit from the development of the team bikes for our pro cyclists and from their experience in racing. In fact, Kreidler mountain bikes always score points in independent tests and in the tough World Cup races in which our factory team participate.

In 2017, the Kreidler factory team enters the racing season with four pro cyclists. In addition to the Olympic cyclist Moritz Milatz and national cyclist Markus Bauer, the aspiring cyclists Tom Ettlich and Christopher Platt will be fighting for wins, places, and World Cup points. The 2016 season impressively demonstrated that our four cyclists and their material were at home among the international MTB elite. We are already excited to find out how successful the factory team will be over the course of the season and will also stay true in 2017 to our slogan:

Kreidler – A Passion for Racing

Trail to Rio

For athletes, but also for us as manufacturers of mountain bikes, there is hardly anything greater than participating in the Olympic Games. Kreidler mountain bikes were used for the first time at the Olympic Games in 2016 by factory team member Moritz Milatz - a historic milestone in the history of the Kreidler brand.

During the Olympics, Moritz Milatz rode the new Stud 29" FS 4.0 Carbon full suspension bike as well as the hardtail in the Stud series (see the next page).

All models and more information on the Kreidler factory team can be found at WWW.KREIDLER.COM

STUD CR CARBON 2.0 Shimano Ultegra 2x11 / Disc

KREIDLER

Straight – No Detour

Straight - uncompromising, light, and stiff. The 27.5" full power machines with up to 150 mm suspension travel – ideal for all-mountain cyclists who appreciate pedaling effectively uphill just as much as surfing the trails safely or fat jumps in rough terrain. The finely balanced kinematics of the Straight almost 100% anti-squat in low gears and a stable suspension thanks to the active pedal bob suppression.

Downhill and at high speed in high gears, the decoupling of the suspension and the drive unit provides for the best possible utilization of the suspension travel. The chassis is supported by a slightly progressive gear ratio and top suspension performance.

LAS VEGAS Shimano Deore 1x9-Speed / Disc

LAS VEGAS 1.0 Shimano SLX 1x11-Speed / Disc

Viva Las Vegas 2.0

The 27.5" high end E-Fully in the Las Vegas series will impress you with its SRAM EX1 1x8-speed drive unit specially developed for E-MTBs and top-class equipment. The sporty 650b full suspension e-bike with its Rock Shox suspension offer adequate suspension travel, even when riding aggressively, and naturally plenty of safety. The high-boost, mid-drive motor is from the Bosch Performance CX series and is driven by a high power 500 Wh PowerPack.

VITALITY DICE SERIES

"It's clear – flying downhill is usually more fun than pedaling uphill. With an e-mountain bike, you practically have your own lift with you and can concentrate completely on getting into the perfect flow."

Torsten Marx, former factory team member and team manager
